the book that launched environmental history william cronon s changes in the land now revised and updated winner of the francis parkman prize in this landmark work of environmental history william cronon offers an original and profound explanation of the effects european colonists sense of property and their pursuit of capitalism had upon the ecosystems of new england reissued here with an updated afterword by the author and a new preface by the distinguished colonialist john demos changes in the land provides a brilliant inter disciplinary interpretation of how land and people influence one another with its chilling closing line the people of plenty were a people of waste cronon s enduring and thought provoking book is ethno ecological history at

its best

what caused the rise of chicago and how did the city's expansion fuel the westward movement of the american frontier and influence the type of society that evolved as a result nature's metropolis emerged as a result of william cronon asking and answering those questions and the work can usefully be seen as an extended example of the critical thinking skill of problem solving in action cronon navigates a path between the followers of frederick jackson turner author of the thesis that american character was shaped by the experience of the frontier and revisionists who sought to suggest that the rugged individualism turner depicted as a creation of life in the west was little but a fiction for cronon the most productive question to ask was not whether or not men forged in the liberty loving furnace of the wild west had the sort of impact on america that turner posited but the quite different one of how capitalism and political economy had combined to drive the westward expansion of the us for cronon individualism was scarcely even possible in a capitalist machine in which humans were little more than cogs and the needs and demands of capital not capitalists prevailed nature's metropolis then is a work in which the rise of chicago is explained by generating alternative possibilities and one that uses a rigorous study of the evidence to decide between competing solutions to the problem it is also a fine work of interpretation for a large part of cronon's argument revolves around his attempt to define exactly what is rural and what is urban and how the two interact to create a novel economic force

this guide provides an overview of the thematic areas analytical aspects and avenues of research which together form a broader conversation around doing spatial history spatial history is not a field with clearly delineated boundaries for the most part it lacks a distinct unambiguous scholarly identity it can only be thought of in relation to other typically more established fields indeed one of the most valuable utilities of spatial history is its capacity to facilitate conversations across those fields consequently it must be discussed in relation to a variety of historiographical contexts each of these have their own intellectual genealogies institutional settings and conceptual path dependencies with this in mind this guide surveys the following areas territoriality infrastructure and borders nature environment and landscape city and home social space and political protest spaces of knowledge spatial imaginaries cartographic representations and historical gis research

this book examines theories and ethnographies related to the anthropology of power in conservation conservation thought and practice is power laden conservation thought is powerfully shaped by the history of ideas of nature and its relation to people and conservation interventions govern and affect peoples and ecologies this

book argues that being able to think deeply particularly about power improves conservation policy making and practice political ecology is by far the most well known and well published approach to thinking about power in conservation this book analyzes the relatively neglected but robust anthropology of conservation literature on politics and power outside political ecology especially literature rooted in foucault it is intended to make four of foucault s concepts of power accessible concepts that are most used in the anthropology of conservation the power of discourses discipline and governmentality subject formation and neoliberal governmentality the important ethnographic literature that these concepts have stimulated is also examined together theory and ethnography underpin our emerging understanding of a new anthropocene shaped world this book will be of great interest to students and scholars of conservation environmental anthropology and political ecology as well as conservation practitioners and policy makers

a finalist for the pulitzer prize and winner of the bancroft prize no one has written a better book about a city nature s metropolis is elegant testimony to the proposition that economic urban environmental and business history can be as graceful powerful and fascinating as a novel kenneth t jackson boston globe

presents extended reviews of noteworthy books short reviews essays and articles on topics and trends in publishing literature culture and the arts includes lists of best sellers hardcover and paperback

a controversial timely reassessment of the environmentalist agenda by outstanding historians scientists and critics in a lead essay that powerfully states the broad argument of the book william cronon writes that the environmentalist goal of wilderness preservation is conceptually and politically wrongheaded among the ironies and entanglements resulting from this goal are the sale of nature in our malls through the nature company and the disputes between working people and environmentalists over spotted owls and other objects of species preservation the problem is that we haven t learned to live responsibly in nature the environmentalist aim of legislating humans out of the wilderness is no solution people cronon argues are inextricably tied to nature whether they live in cities or countryside rather than attempt to exclude humans environmental advocates should help us learn to live in some sustainable relationship with nature it is our home
